# SPECIAL PURPOSE & CUSTOM REELS

When a specific handling problem requires a completely different type of reel, Hannay offers the design experience and manufacturing flexibility unique in its field. We have custom designed and built reels to handle hose and cable in limited space and in special environments ... reels to handle exotic fuels and dry chemicals ... reels with unique drive systems and reels to operate automatically ... more custom built reels than any other manufacturer.

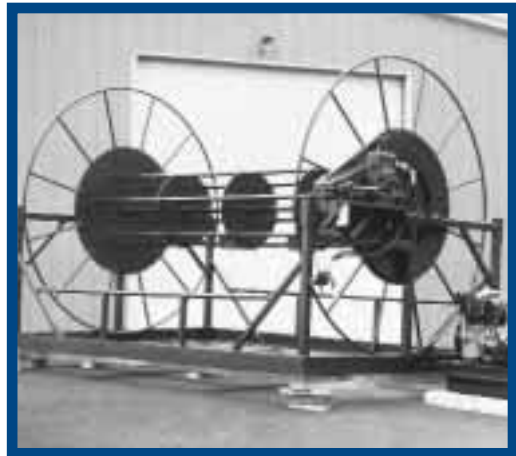

Because a reel is basically a spool and frame equipped with piping to permit continuous fluid flow, reels that handle hose for special applications can often be assembled from these standard components. In this way, additional costs for custom engineering are eliminated and only modest additional costs are incurred for special fabrication. When you need a custom built reel, our staff is ready to work with you in developing the best possible reel for the job.

## ORDERING & QUOTATIONS

To supply proper information for orders and quotations, see order worksheet found in the Ordering Guide & Accessory Catalog H-9412-OA.

Requests for quotations for custom reels and spools should include:

- Complete specifications of hose cable size, length and weight
- Bending radius of hose or cable
- Type of product to be handled
- Hose inlet and outlet type
- Type of rewind mechanism
- Complete description of how the reel is to be installed and used
- Specification of any accessories
